*REPERTÓRIO HOMEOPÁTICO*

**REPERTÓRIO PRÁTICO DE  
SINTOMAS GERAIS  
HOMEOPÁTICOS**

**WWW.HOMEOESP.ORG**

# INTRODUÇÃO

Este repertório surge na sequência do *Repertório Prático de Sintomas Homeopáticos*. Nasce pela insistência dos alunos que ao longo do tempo fomos formando nesta ciência e arte de curar. Pressupõe-se que quem se iniciou na técnica da repertorização ambicione uma compilação de sinais e sintomas o mais completa possível. Não será obviamente com este trabalho, apesar de mais extenso e acabado do que o anterior, que o iremos conseguir. O SIHORE fará o que se nos torna inviável, por limitações próprias.

Não vamos aqui repetir todos os conceitos introdutórios constantes do *Repertório Prático de Sintomas Homeopáticos*, para onde remetemos, e que podem ser anexados a este, por um simples processo de colagem.

&&&

No *Repertório Prático de Sintomas Gerais Homeopáticos* iremos manter a descrição sintomática das rubricas, tal como constam do **SIHORE**, bem como os medicamentos válidos no sistema, pressupondo que os utilizadores deste repertório irão num curto espaço de tempo passar a empregar na prática clínica o dito repertório digital, na nossa perspectiva um

dos mais abrangentes e completos em língua portuguesa – veja-se o artigo “SIHORE, UM REPERTÓRIO DIGITAL”, em [www.homeoesp.org](http://www.homeoesp.org) -.

Como elucida Favilla, o seu autor:

“Foram retirados do sistema todas as palavras que não levam informação para o entendimento do sintoma. Assim, este repertório pode denominar-se de repertório por palavras chave para computador:

Exemplos de sintomas:

PENA\$SILENCIOSA

COMPANHIA\$AVERSÃO\$MEDO\$SOZINHO\$POREM

TRANSTORNOS\$COLERA\$INDIGNACAO

TRISTEZA\$CHORAR\$NÃO\$PODE

DOR&TESTA\$CONTATOS\$ >

DOR&TESTA&NARIZ&RAIZ\$MENSTRUACAO\$DURANTE

Esta maneira do SIHORE manter a ordem, tal como a idealizada por Kent é a mais correcta. Mantém estritamente a ordem de Kent, só diferindo que em temporabilidade a ordem é alfabética e não cronológica. Mais fácil de procurar.

(...) Inicialmente o médico pode achar estranha esta forma de descrever os sintomas, mas em pouco tempo, o seu raciocínio acostumar-se-á a pesquisar deste modo.”

&&&

O *RPSGH*, privilegia como o seu próprio título acusa, os Sintomas Gerais, tal como o seu antecessor – *o Rep. Pr. De S.H.* –, e apesar de seguir a estrutura do de Kent, foram os seus capítulos integralmente reformulados, com a firme intenção de serem atingidos os objectivos propostos.

Muitas das suas rubricas pertencem ao Repertório de Barthel, o mais perfeito no nosso entender no que toca aos sintomas gerais.

Também aqui, a análise estatística e a fiabilidade sintomática se constituíram como fio condutor na escolha das rubricas e sub-rubricas.

Numa primeira abordagem, e sem a pretensão de sermos exaustivos, qualificaremos como SINTOMAS GERAIS:

- Capítulos com rubricas predominantemente gerais

- Mental
- Vertigem
- Sono, sonhos
- Calafrio
- Febre

  - Desejos e Aversões Alimentares
  - Eructações
  - Náuseas

  - Pele – muitas vezes os sintomas são gerais.

Há ainda que realçar a visão, a audição, a tosse, o olfacto – *capítulo referente ao nariz* –, paladar e salivacão – *do capítulo boca* –, e micção – *do capítulo bexiga* –.

Do *Repertório Prático De Sintomas Gerais Homeopáticos*, constam apenas rubricas e sub-rubricas, tal como do seu antecessor.

As expressões repertoriais aproximam-se na medida do possível das utilizadas nos sistemas digitais – *no caso presente do SIHORE* –, proporcionando uma introdução à pesquisa nos programas informáticos originários do Brasil.

Os medicamentos, estão enunciados por graus:

1º Grau, pontuação 3 nos quadros repertoriais – *Todas as letras da abreviatura em maiúsculas* – v.g., AUR –.

Tratam-se de sintomas que foram observados na totalidade ou na maioria dos experimentadores, com curas clínicas confirmadas.

2º Grau, pontuação 2 nos quadros repertoriais – *A primeira letra da abreviatura em maiúscula, as seguintes em minúscula* – v.g., Aur –.

Sintomas observados nalguns experimentadores, bem como algumas vezes na prática clínica.

3º Grau, pontuação 1 nos quadros repertoriais – *Todas as letras em minúsculas* – v.g., aur –.

Sintomas apenas obtidos através de um ou de raros experimentadores.

Como abreviaturas, para além das dos medicamentos usamos:

< - Agravação

> - Melhoria

Nas rubricas de modalidades, se nada vier escrito quanto à agravação ou melhoria, deve considerar-se como modalidade de agravação.

A listagem dos remédios válidos no sistema (SIHORE), encontram-se em anexo, no final do repertório – **ANEXO I** –.

Também em anexo, enunciamos as siglas dos principais medicamentos, ou seja, dos que estatisticamente têm maiores probabilidades de surgir numa repertorização. Por outro lado, são também em regra, os que podemos encontrar em matérias médicas consagradas – *como a de Clarke* –, bem como os que foram sujeitos a cuidadas experimentações – **ANEXO II** –.

O **ANEXO III**, é uma listagem de medicamentos e das suas relações.

Repetimos aqui, o que deixámos expresso no *Repertório Prático de Sintomas Homeopáticos*:

**“Optámos por não incluir, quer sinonímias, quer referências cruzadas.**

**Consideramos quase que obrigatório, que seja o prático a elaborar o seu próprio índice. Será a única forma de conhecer o repertório e de obter sucesso na repertorização.**

**Tratando-se de um repertório pouco extenso, podem as rubricas e sub-rubricas ser visualizadas num curto espaço de tempo, o que promoverá obrigatoriamente o seu conhecimento e localização.**

**O tempo julgará a nossa convicção.”**

Para além disso, cada um poderá aditar as rubricas que entender, como consequência da consulta de outros repertórios e em conformidade com a sua experiência clínica.

Não é obviamente um trabalho acabado, mas uma proposta de intervenção activa a todos os que respeitam a doutrina de Hahnemann e não se abandonam ao facilitismo dos falsos homeopatas.

Na impossibilidade de informatizarmos o repertório, o prático poderá socorrer-se dos comandos do Word:

**Editar**

**Localizar**

ou **Substituir** – onde nos surge a função **Localizar Seguinte**

*Para quem a prática médica não se constitui como  
uma desumana corrida ao “ouro”*

## ANEXO III

### RELAÇÕES CLÍNICAS DOS MEDICAMENTOS

As relações clínicas dos medicamentos assumem uma posição, quer melindrosa, quer de necessária utilidade na prática consciente e diligente da Homeopatia.

Gibson Miller, foi um homeopata que elaborou um pequeno fascículo de extrema importância para a prática quotidiana, denominado “*Relationship of remedies, with duration of action*”. Nele, cita o remédio e identifica os seus complementares, os que o seguem bem, os incompatíveis, antídotos e a duração de acção.

Esta última é meramente indicativa, já que tem de ser sempre aferida pelo estado do paciente. Quando este deixa de sentir um estado de bem estar geral, quando se começa a sentir de novo sem forças, o medicamento deixou de exercer o seu efeito. Aí, em regra, o *simillimum* deve ser de novo prescrito, com uma dinamização aumentada.

Atente-se que a duração de acção do remédio homeopático depende quase que exclusivamente da similitude da prescrição e não da sua dinamização. A duração de acção é proporcional à similitude.

Este anexo fundamenta-se quase que integralmente no trabalho de Gibson Miller no que toca às relações entre os remédios e duração de acção, pontualmente de Jahr, quanto a esta última. Os dados colhidos por Jahr, que distingue a duração da acção nos casos agudos, da duração nos crónicos, não são integralmente coincidentes com os de Miller. Assim, e

sempre que se justifique, o que ocorre também num pequeno número de medicamentos não estudados por Miller, iremos incluí-los entre parêntesis na respectiva rubrica – trabalho que constitui também anexo do nosso livro, *Homeopatia Essencial*, da editora SeteCaminhos.

Inserimos ainda, porque essencial, uma rubrica relativa às precauções e cuidados a ter com certos medicamentos e em determinadas condições.

Não é possível exercer homeopatia sem que se tenham em consideração e presentes em cada prescrição, para além de todas as regras e procedimentos enunciados nos vários artigos do nosso site – [www.homeoesp.org](http://www.homeoesp.org) -, os dados constantes deste trabalho, sob pena de eventuais erros graves, múltiplas vezes ocultos, mas que se repercutem fatalmente no paciente.
